The two full-flock losses: fish become shallow again, while travel eligibility stays zero
Default mixed · school 39061001
Gannets only · school 39061002
Fish depth (model units)
Median fish depth
Shallowest fish
New-target depth cap (7.93)
Living fish count
Fish passing depth gate
Most eligible targets for any bird
All birds in search
Elapsed model time (T)
Solid vertical: last G launch; dashed blue: last committed water entry; dotted grey: last bout end.
Eligibility is a sampled new-target test, not capture probability or physical readiness. Curves use saved 0.1T frames.
